

HUGOTON ROYALTY TRUST DECLARES SEPTEMBER CASH DISTRIBUTION

Dallas, Texas, September 19, 2008 – U.S. Trust, Bank of America Private Wealth Management, as Trustee of the Hugoton Royalty Trust (NYSE – HGT), today declared a cash distribution to the holders of its units of beneficial interest of \$0.404446 per unit, payable on October 15, 2008, to unitholders of record on September 30, 2008. The following table shows underlying gas sales and average prices attributable to the net overriding royalty payments made by XTO Energy Inc. (XTO Energy) to the Trust for both the current month and prior month distributions. Underlying gas sales volumes attributable to the current month distribution were primarily produced in July.

	Underlying Gas Sales Volumes (Mcf) ^(a)		Average Gas Price per Mcf
	Total	Daily	
Current Month Distribution	2,383,000	77,000	\$ 11.04
Prior Month Distribution	2,303,000	77,000	\$ 9.80

(a) Sales volumes are recorded in the month the trust receives the related net profits income. Because of this, sales volumes may fluctuate from month to month based on the timing of cash receipts.

XTO Energy has advised the trustee that seventeen wells are currently being drilled on the underlying properties and that it has deducted budgeted development costs of \$4,000,000, production expense of \$2,738,000 and overhead of \$853,000 in determining the royalty payment to the Trust for the current month.

Development Costs

XTO Energy has advised the trustee that it increased the monthly development cost deduction from \$3,750,000 to \$4,000,000 beginning with the September 2008 distribution. The development cost deduction is expected to be maintained at \$4,000,000 through the December 2008 distribution. The development cost deduction will continue to be evaluated and revised as necessary.

Other

XTO Energy has advised the trustee that scheduled pipeline maintenance on a major pipeline transporting gas from the Rocky Mountain region has led to lower realized gas prices for production in this area, beginning with September 2008 production. The downward pressure on realized gas prices is expected to result in lower monthly trust distributions over the near term.
